Mohammad Taha
Flutter Developer

Karachi, Pakistan • +92 331 3136702 • m.7taharajpoot@gmail.com • LinkedIn • GitHub • Portfolio

Summary

Flutter Developer with 3+ years of experience building mobile applications with Flutter and Dart. Skilled in state management, REST APIs, Firebase, and third-party integrations.

Experience

TechSwivel LLC
Flutter Developer March 2024 – Oct 2026

- Planned project tasks and timelines with project managers, coordinating development activities around project milestones and delivery schedules.
- Led and supported junior developers through task assignment, technical guidance, and code-level collaboration.
- Coordinated with backend developers on API structures and backend requirements to ensure effective mobile integration.
- Participated in Flutter developer interviews and contributed to candidate evaluation

NextWys Software Solutions
Flutter Developer July 2025 – Aug 2026

- Managed client projects end-to-end, from requirements gathering and project planning through development and final delivery.
- Communicated directly with clients to define requirements, clarify scope, and translate business needs into mobile solutions.
- Independently developed Flutter applications and delivered project features according to agreed requirements and timelines.
- Managed final project handovers and delivered completed applications to clients.

ClothieX
Flutter Developer Intern Dec 2023 – Feb 2024

- Contributed to the development and maintenance of a production mobile application for a clothing cleaning and pressing startup.
- Implemented assigned Flutter features and UI components within an existing application codebase

Skills

- **Languages**: Dart
- **Framework**: Flutter
- **State Management**: BLoC, GetX, Provider
- **Backend & APIs:** Firebase, RESTful APIs
- **Integrations:** Google Maps, Push Notifications
- **Development:** Responsive Design, UI/UX Design, Testing & Debugging
- **Version Control:** Git

Education

University Of Sindh **Jamshoro**
Bachelors Software Engineering February 2024

Projects

Hitchyke - Ride-Sharing & Safety Platform

- Developed features for driver and rider mobile applications for an Uber-style ride-sharing platform.
- Implemented navigation, location-based functionality, and ride-related workflows using Google Maps and navigation services.
- Integrated REST APIs and BLoC state management across assigned application modules.
- Contributed to safety-focused functionality, including features designed to alert relevant authorities when required.

Closetly - E-commerce Marketplace

- Developed features for a marketplace connecting buyers and sellers of new and used clothing.
- Implemented separate buyer and seller workflows, including seller registration, product listings, and item management.
- Integrated Stripe payment functionality and implemented product search and filtering.

Emwari - Salon & Service Booking Platform

- Developed Flutter features for a multi-platform service marketplace spanning mobile, web, kiosk, and brand portal applications.
- Implemented customer workflows for discovering businesses, booking services, making payments, and accessing discounts.
- Worked on service-provider workflows, including business registration, service management, and customer bookings.
- Implemented location-based business listings and service discovery functionality.

Fluency Therapist - AI-Powered Speech Therapy Platform

- Developed a speech therapy platform supporting Doctor and Patient accounts with AI-based speech exercises for patients.
- Implemented appointment booking and real-time communication through video calls, audio calls, and in-app chat.
- Integrated Firebase Authentication and ZegoCloud to support authentication and real-time communication.

Sarwari Jamaat - Community & Event Management Application

- Developed a mobile application for managing and communicating Jamaat meetings, events, and activities.
- Implemented event and meeting schedules with detailed information and photo-based content.
- Developed interfaces for users to access upcoming activities, event details, and organizational updates.

Car Showroom - Used Car Marketplace

- Developed a mobile application for sellers to list used vehicles for potential buyers.
- Implemented vehicle browsing and seller contact workflows, allowing buyers to connect directly through WhatsApp.
- Built responsive Flutter interfaces for vehicle listings and customer interaction.
